For Immediate Release

Emerson Ecologics Receives VAWD Accreditation

Manchester, NH – September 11, 2015- Emerson Ecologics, LLC, is pleased to announce its accreditation as a Verified-Accredited Wholesale Distributor (VAWD). VAWD is the highest credentialing of the National Association of Boards of Pharmacy, and an affirmation of Emerson’s steadfast commitment to maintaining the best quality practices in the handling of not only prescription products, but all nutritional supplements and natural health products.

VAWD accreditation is vital in protecting the public from contaminated, diverted or counterfeited drugs, and is recognized by 21 states as a means of implementing their state pharmacy laws, with additional states requiring the VAWD accreditation as a component of state licensure. In these states, VAWD assures that facilities employ the best security and operational practices when distributing prescription drugs from manufacturers to pharmacies, doctors and other institutions.

The Emerson team is proud to receive this prestigious accreditation and applauds its Quality team on their efforts during the completion of the rigorous compliance review. The VAWD credential complements the stringent standards of the Emerson Quality Program® (EQP), and furthers Emerson’s industry leadership in providing the highest-quality nutritional vitamins, supplements and prescription products to integrative healthcare practitioners.

For more information on the Verified-Accredited Wholesale Distributor (VAWD) certification visit www.nabp.net and you can learn more about the Emerson Quality Program® (EQP) at www.emersonecologics.com/quality.
